# Exchange-traded Fund Platform

(Referred to as “ETF” )

# Market Conditions & Demand

AMUN

With the advent of the bear market, the trading trend of digital currencies in the second half of 2018 has become more and more sluggish, with the price of digital assets generally falling sharply from the beginning of the year, and the overall market falling by about **90%**

In the market falling market, the operation of currency, speculation is very easy to lose money, the market needs more means of profit. As a result, derivatives have bucked the trend, with investors turning to digital currency futures contracts

# Exchange-traded Fund Platform

AMUN

## **The exchange-traded fund platform was established**

In November 2018, the world's first digital currency Exchange Traded Funds in Europe's fourth-largest Exchange the SIX Swiss Exchange began trading, the market value of \$1.6 trillion, the digital currency called Amun AG company won government approval in traditional stock Exchange a index fund, foundation, tracking digital currency market share of the largest and the most potential companies and assets allocation accordingly. The Chicago board options exchange (cboe), a leading U.S. financial firm, is following suit, partnering with Amun AG to create an exchange-traded fund, or ETF

# Public Participation! Share Makes Money!

AMUN

After successful registration, users can be invited to participate in the platform transactions. Each user can invite several users. Even if he/she has no investment, he/she can also get the transaction fee income within nine generations of his/her team

**Generation 1 -9, is the first generation to take a few percent commission transaction fees**

Note: the transaction fee on the platform is 2% of the transaction amount

# Low Input, High Revenue "Super Platform"

AMUN

1 bitcoin

**Become**

**"Super platform" users**

## Four earnings

- 1 Enjoy the platform transaction fee algebra percentage of profit
- 2 Enjoy the sharing of platform operation income, and get 50% of the total transaction operation income of the team within 9 generations
- 3 Its users become the "super platform" and get the algebraic percentage recommendation commission of the "super platform" users
- 4 When the total operating income of its team is  $>$ , all members of the "super platform" users in the team will enjoy the algebraic percentage income commission of the total operating income of its team, and they can get unlimited generations

Note: ordinary users cannot enjoy any benefits from the following "super platform" users

# "Super Platform" User Four Revenue Examples

AMUN

## 1 Enjoy the platform transaction fee algebra percentage of profit

**Generation 1 -9, is the first generation to take a few percent commission transaction fees**

# "Super Platform" User Four Revenue Examples

AMUN

- 2** Enjoy the sharing of platform operation income, and get 50% of the total transaction operation income of the team within 9 generations

Direct To obtain

1000万 \* 50% = 500万

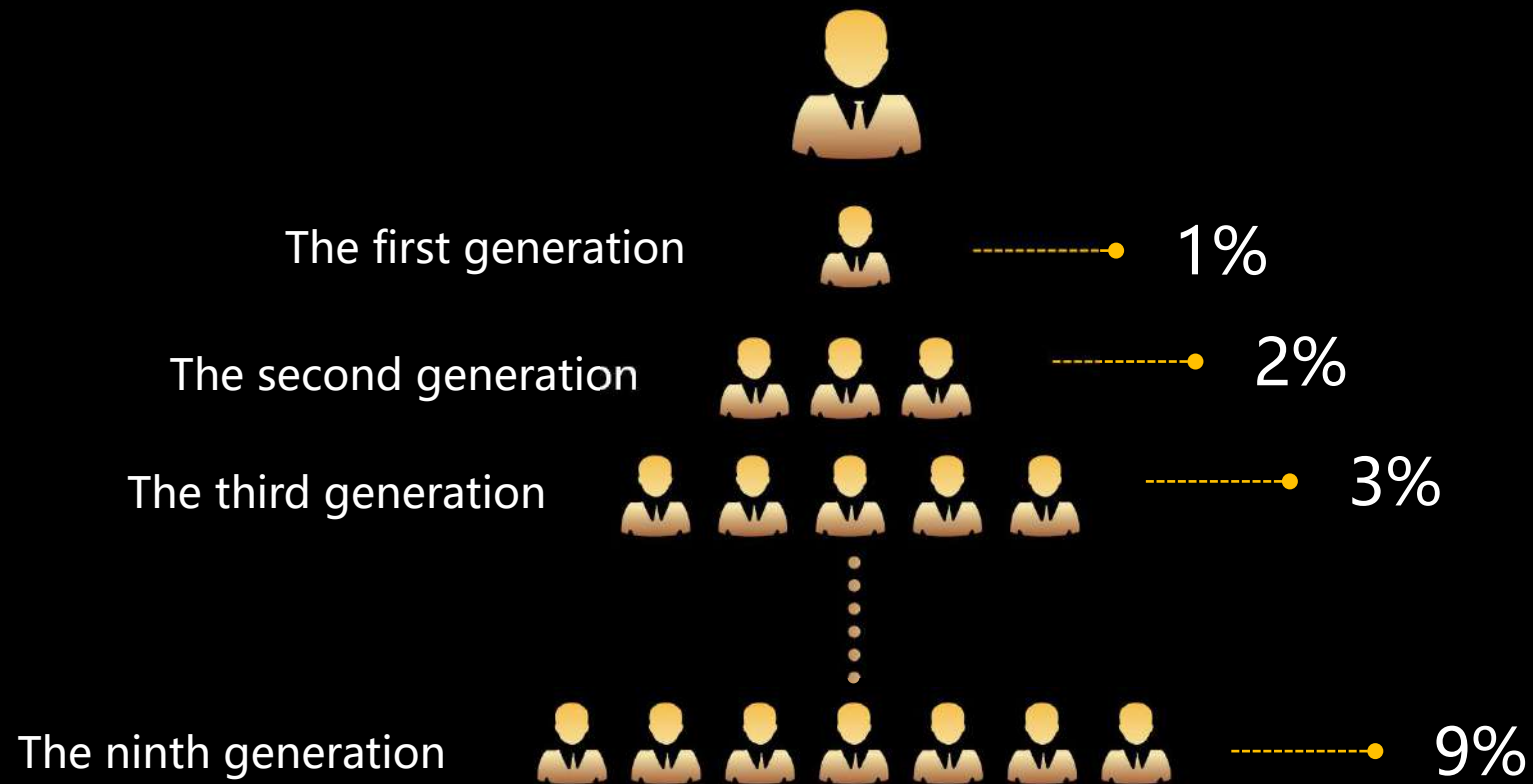

If the team operating income 10 million

# "Super Platform" User Four Revenue Examples

AMUN

3

Its users become the "super platform" and get the algebraic percentage recommendation commission of the "super platform" users

**Gen 1-9, which is the first gen to get a few percent commission on application fees for the "" super platform" "users**

# "Super Platform" User Four Revenue Examples

AMUN

4

When the total operating income of its team is  $>$ , all members of the "super platform" users in the team will enjoy the algebraic percentage income commission of the total operating income of its team, and they can get unlimited generations

Assuming everyone is a "super platform" user, if the total operating income of E9 is 10 million, **E9** will take 50%, that is, 5 million

Because E9 is the first generation of E8, **E8** gets 1% of E9's revenue, which is 1% of \$5 million, which is \$50,000

E9 is the second generation of E7, so **E7** gets 2% of E9's earnings, which is 2% of \$5 million, which is \$100,000

All the way down to generation 9 **E** gets 9% of 5 million, which is 450,000

If E8 itself has no total operating income, then E7, because E8 is the first generation of **E7**, can get 1% of E8 income and 1% of \$50,000, that is, 500

Until **D9** takes 9 percent of \$50,000, which is 4,500

If E8 has a total operating income of 2 million yuan, E8 will take 50%, that is, 1 million yuan; Because E8 is the first generation of E7, **E7** gets 1% of E8's earnings, which is (5+1 million) 1%, which is 10,500

Until **D9** takes 9 percent of (5+1 million), which is 94,500  
And so on up to the ninth generation

**So become a "super platform" user, even if you have the 10,000th individual income, you will also get income, really do infinite generation**

E9旗下经营  
收入1000万

# Two Awards: ETF Exchange-traded Fund Platform – A Boon For Investors!

AMUN
